

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

Only reliable, quick, and cost-free way to locate the fire can be a system-efficient. The quantity of time it takes to respond to different fire alarm systems can directly correlated. The damage also occurs as the period between intervention shortens. The time between fire detection and extinguishment, also known as the reaction or response time of a fire management system, is hence the most crucial component.

Write down any ideas that come to mind that address your problem statement.

10 minutes.

You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

<p>Fire Alarm in Aspi- ratio in Dele- tion(s) -ability of access for fire officers and pass- en- gers</p>	<p>use multipl- e members for the detection in window fire alarm technology is only being used at national level, by very specific</p>

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

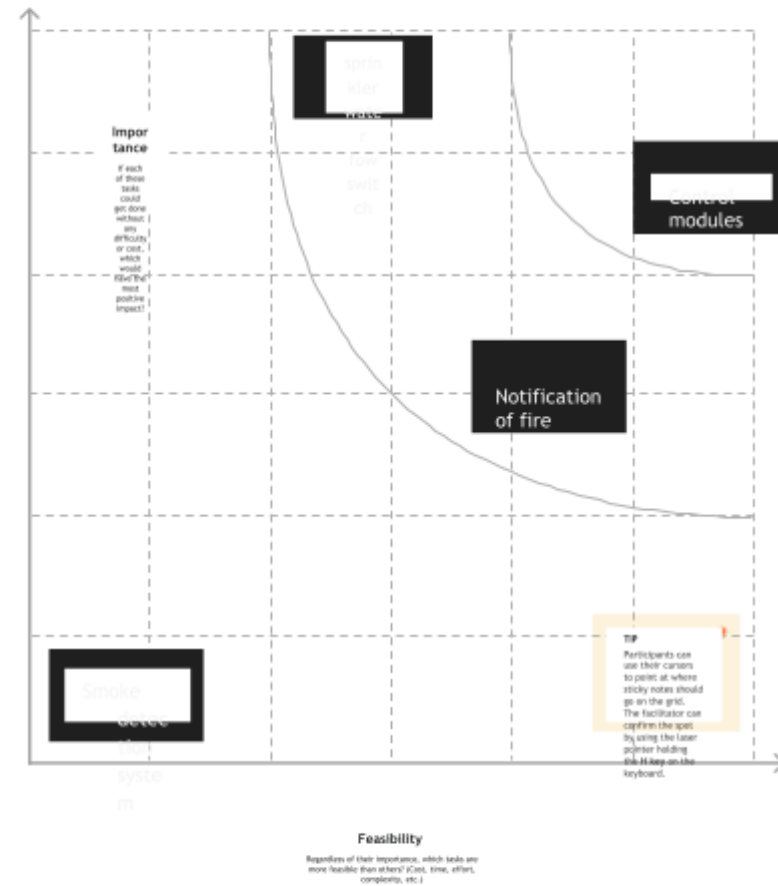

20 minutes

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important items as they're written.

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

- A **Share the mural**
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.
- B **Export the mural**
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward
